

Engine (ignition) Switch

With the electronic key on your person, the engine can be started by simply pressing the “ENGINE START STOP” switch while depressing the brake pedal.
(The mechanical key cannot be used to start the engine.)

n Starting the engine

Make sure the parking brake is set and the shift lever is in P.

- 1 Depress the brake pedal.
The “ENGINE START STOP” switch indicator light turns green.
- 2 Press the “ENGINE START STOP” switch.

n Stopping the engine

- 1 Set the parking brake and shift the shift lever to P.
- 2 Press the “ENGINE START STOP” switch.

n Changing “ENGINE START STOP” switch modes

To change the “ENGINE START STOP” switch mode without turning on the engine, press the “ENGINE START STOP” switch without depressing the brake pedal. The mode can be changed in the following order:

Automatic Transmission

n Shift positions

- P Park
- R Reverse
- N Neutral (drive not engaged)
- D Drive
- M M mode

← The vehicle can only be shifted out of P when the “ENGINE START STOP” switch is in IGNITION ON mode and the brake pedal is depressed.

Customizing Your Lexus

n Changing shift ranges in the D position

Operating the paddle shift switches allows shift ranges to be selected to suit the driving conditions.

- 1 Pull the “-” paddle shift switch toward you.
The indicator in the meter cluster will change to display the selected shift range.

- 2 **Higher shift range:**
Pull the “+” paddle shift switch toward you.
Lower shift range:
Pull the “-” paddle shift switch toward you.

Pulling and holding the “+” paddle shift switch for a certain period of time allows you to return to normal D position driving. If the accelerator pedal is depressed for more than a certain period of time in one range, shift range selection in the D position will be automatically deactivated.

n Changing gears in the M position

Operating the shift lever or paddle shift switches allows a gear to be selected and held, enabling you to time gear shifts as you please while driving.

1 Shift the shift lever to M.

The indicator in the meter cluster will change to display the selected gear.

2 To upshift:

Move the shift lever in the "+" direction, or pull the "+" paddle shift switch toward you.

To downshift:

Move the shift lever in the "-" direction, or pull the "-" paddle shift switch toward you.

In M mode, the gear will change only when the shift lever or paddle shift switches are operated. However, when the vehicle speed drops the gear will be automatically downshifted.

F-Sport Mode Total Control Switch

F-sport mode total control switch allows you to select a driving mode that suits the road conditions or your preference.

1 "Sport" mode

Various driving controls are adjusted, enabling sporty driving.

2 Snow mode

For starting or accelerating on snow-covered roads or other slippery surfaces.

An indicator comes on in the meter cluster when in "Sport" or snow mode.

To cancel the mode, press the same side of the switch again. When the "ENGINE START STOP" switch is turned OFF, the mode is automatically deactivated.

Parking Brake

To set the parking brake: firmly depress the parking brake pedal.

To release the parking brake: depress the parking brake pedal again.

Turn Signal Lever

- 1 Right turn signal
- 2 Left turn signal

To signal a lane change, move the lever partway and hold.

Customizing Your Lexus

Multi-information Display

The multi-information display shows information about your vehicle, including the items shown below.

n Display information

- 1 Trip information
 - Outside temperature
 - Driving range
 - Average fuel consumption
 - Average fuel consumption after refueling
 - Current fuel consumption
 - Average vehicle speed
 - Gear position
- 1 Satellite switch mode
- 1 Intuitive parking assist information (if equipped)
- 1 Dynamic radar cruise control settings (if equipped)
- 1 Warning messages

n Changing the display of trip information

Trip information items can be switched by pressing the “DISP” switch.

- n When using the intuitive parking assist or dynamic radar cruise control, the appropriate display is shown on the screen.
- n In the event that a problem is detected in any of the vehicle's systems, a warning message is shown on the multi-information display.

Satellite Switches

The satellite switches can be used to change the settings of various functions. Settings are shown on the multi-information display.

The satellite switches can be used to change the settings of the following items.

- 1 Intuitive parking assist (if equipped)
- 1 Tire inflation pressure warning system initialization
- 1 ID code selection for tire inflation pressure warning system
- 1 AFS (Adaptive Front-lighting System)

n Changing the settings

- 1 To cycle through the functions, press either the left or right selector switch.

- 2 To change the settings, press the "ON/OFF" button.

For detailed information on changing the settings, see the Owner's Manual.

Emergency Flasher Switch

Engaging the emergency flasher switch causes all the turn signal lights to flash.

The emergency flashers can be operated even when the "ENGINE START STOP" switch is OFF.

Intuitive Parking Assist (If Equipped)

The system uses a screen display and buzzer to inform the driver of obstacles near the vehicle when parking or driving at low speed.

n Turning the system on and off

The system can be turned on and off using the satellite switch. (→P.24)

n Screen display

Sensors are used to detect obstacles near the vehicle. The distance to a detected obstacle is shown by the number of indicator bars.

- 1 Indicates obstacles detected by the corner sensors
- 2 Indicates obstacles detected by the back sensors

Cruise Control (If Equipped)

Cruise control allows the driver to maintain a constant speed without having to operate the accelerator pedal.

Use for highway driving or when traveling at a constant speed for long periods of time.

n Setting the speed

- 1 Press the "ON-OFF" button.
The system will turn on.
- 2 Accelerate or decelerate to the desired speed, and then push the lever down.
This sets the speed in the cruise control memory.

n Canceling

- 1 To temporarily cancel the cruise control, pull the lever toward you. To resume the cruise control, push the lever up.
- 2 To turn the system off, press the "ON-OFF" button.

n Adjusting the speed setting

- To increase speed:** push the lever up.
To decrease speed: push the lever down.

Release the lever when the desired speed is reached.

Dynamic Radar Cruise Control (If Equipped)

Dynamic radar cruise control supplements conventional cruise control with a vehicle-to-vehicle distance control mode.

n Cruise control display

Cruise control settings are shown on the multi-information display.

- 1 Vehicle ahead indicator
- 2 Vehicle-to-vehicle distance
- 3 Preset speed

n Vehicle-to-vehicle distance control mode

- 1 Press the "ON-OFF" button.
- 2 Accelerate or decelerate to the desired speed, and then push the lever down. Vehicle-to-vehicle distance can be adjusted using the distance switch.

n Constant speed control mode

- 1 Press the "ON-OFF" button.
- 2 Push the lever forward and hold for at least one second.
- 3 Accelerate or decelerate to the desired speed, and then push the lever down.

n Canceling

- 1 To temporarily cancel the dynamic radar cruise control, pull the lever toward you. To resume the cruise control, push the lever up.
- 2 To turn the system off, press the "ON-OFF" button.

n Adjusting the speed setting

To increase speed: push the lever up.

To decrease speed: push the lever down.

Release the lever when the desired speed is reached.

The vehicle-to-vehicle distance control mode maintains the preset cruising speed as long as no vehicle is detected ahead.
